PROFESSIONAL SUMMARY

Computer Science graduate and independent AI application developer with hands-on experience building production-style, AI-powered web applications using Python, Generative AI, LLM APIs, prompt engineering, REST APIs, React, and Streamlit. Built NovaMind AI, a five-module platform integrating Google Gemini and OpenAI APIs, serving 200+ test users across Education, Career Guidance, Finance, Document Analyzer, and AI Dashboard modules. Skilled in translating product ideas into working software through API-driven workflows, structured prompt layers, session-aware interactions, modular architecture, and responsive UI. Focused on combining software engineering and applied AI to ship useful, measurable products.

INDEPENDENT AI APPLICATION DEVELOPMENT

Independent AI Application Developer | Self-Directed Product Development

Chennai, India | Jan 2024 – Present

- Designed and shipped **NovaMind AI**, a five-module AI platform (Education, Career Guidance, Finance, Document Analyzer, AI Dashboard) used by **200+ test users** across web and mobile.
- Integrated **2 major LLM APIs** — Google Gemini and OpenAI — into a unified context-aware response pipeline, reducing average response latency by **35%** through prompt layering and caching.
- Built a reusable application architecture separating API logic, prompt layers, processing functions, UI components, and session-aware workflows, cutting new module build time by **40%**.
- Applied structured context injection and few-shot prompting to improve response relevance by **~30%** in internal A/B evaluations across **500+ test prompts**.
- Developed **3 responsive web projects** including an interactive React dashboard with real-time API rendering, achieving **sub-2-second load times** and **95+ Lighthouse accessibility scores**.
- Deployed and iterated on all projects using Git, GitHub, and VS Code with version-controlled, modular codebases.

SELECTED PROJECTS

NovaMind AI — Intelligent Multi-Domain Assistant

Python · Streamlit · Google Gemini API · OpenAI API · Prompt Engineering · React · Bootstrap

- Engineered a full-stack AI application with **5 user-facing modules**, handling **1,000+ API calls** during testing.
- Built context-aware response pipelines and streamlined workflows using LLM API integration and session state.
- Designed a session-aware, multi-page interactive interface using Streamlit and Bootstrap layout principles.
- Separated API logic, prompt layers, and processing functions into a modular structure reused across all 5 modules.

Interactive React Dashboard

React · CSS3 · REST APIs · React Hooks

- Built a dynamic single-page dashboard rendering real-time API data with React Hooks state management.
- Implemented **12+ reusable responsive components** for desktop, tablet, and mobile experiences.
- Reduced re-render time by **25%** through memoization and component-level state isolation.

Responsive Portfolio Website

HTML5 · CSS3 · Bootstrap · CSS Grid · Flexbox

- Built a fully responsive multi-section portfolio using semantic HTML5, CSS Grid, Flexbox, and Bootstrap.
- Achieved **sub-2-second load times** and **95+ accessibility scores** through asset optimization.
- Delivered consistent layouts across desktop, tablet, and mobile screen sizes.

TECHNICAL SKILLS

Programming: Python

AI & GenAI: Generative AI · LLM APIs · Prompt Engineering · Google Gemini API · OpenAI API · Machine Learning Fundamentals

Web Development: React · HTML5 · CSS3 · Bootstrap · Three.js · Streamlit

APIs & Data: REST APIs · API Integration · Data Processing · Big Data Analytics

Tools: Git · GitHub · VS Code · Streamlit Cloud · Postman

EDUCATION

B.Sc. in Computer Science — Al-Ameen Arts, Science & Commerce College, Bengaluru

Graduated: 2026

Relevant Coursework: Algorithms · Artificial Intelligence · Data Structures · Databases · Software Engineering

PCMC — 12th Standard — Islamiah Higher Secondary School, Parnambut

Completed: 2023

CERTIFICATIONS

- Designing and Implementing Big Data Analytics Solutions — Deloitte (2024)
- GenAI Powered Data Analytics — Forage (2024)
- Artificial Intelligence Fundamentals — IBM (2024)
- Data Science and Machine Learning — FutureSkills Prime (2024)
- Getting Started with Artificial Intelligence — IBM (2024)
- Job Application Essentials — IBM (2024)
- Project Management Fundamentals — IBM (2024)

CAREER FOCUS

AI / GenAI Application Development · Python Development · Full-Stack Development · Web Development · LLM Integration · Prompt Engineering

PROFILE HIGHLIGHTS

- Practical AI application development with modern LLM APIs (Google Gemini, OpenAI) across 5+ modules.
- Hands-on experience building responsive web interfaces and interactive React applications with 12+ reusable components.
- Strong focus on prompt engineering, API integration, data processing, and modular application architecture.
- Delivered measurable improvements: 35% latency reduction, 30% relevance gain, 40% faster module builds, 95+ accessibility scores.
- Interested in opportunities where software engineering and applied AI combine to build useful, scalable products.
